**Global Risk Intelligence Service**

# WHY RISK ALERTS

“As risks become more interconnected and complex, the use of advanced technologies to turn risk data into actionable insights will be essential.

These tools can help risk managers make faster, more informed decisions and better anticipate potential threats and opportunities.”

Typhaine Beaupérin chief executive officer and secretary general of The Federation of European Risk Management Associations

**Global Risk Intelligence Service**

# STAY AHEAD OF THE CURVE

Traditional risk assessments rely on historical data—often too slow to keep up with today’s rapidly shifting risk landscape.

Our cutting-edge early warning system, powered by **Internet of Things (IoT) technology and AI**, is transforming the insurance industry.

We provide **immediate, data-driven insights** that help Risk Managers **stay ahead of threats**, improve decision-making, and proactively protect their clients.

# RISK ALERTS

Your Early Warning  
System for Emerging  
Risks

## BENEFITS

- **Stay ahead, not behind.** Traditional assessments are retrospective—our alerts are predictive.
- **Instant Situational Awareness:** Immediate notification of operational, environmental, compliance, and emerging threats.
- **Faster Response Time:** Make decisions within minutes, not days.
- **Loss Prevention:** Act on early warnings before a threat becomes a loss.
- **Customisable Alerts:** Receive only what's relevant to your portfolio, region, or sector.
